Rasoul Sorkhabi is Professor of Geology at the University of Utah, Salt Lake City. Formerly, he worked at Arizona State University and Japan National Oil Corporation. Born in Iran, Rasoul left the country as a young boy and has lived and studied in India, Japan, and the United States. A visit to the Himalaya in Kashmir inspired him to study geology. His PhD thesis in 1991 concerned the structural geology and geochronology of the northwestern Himalaya in India. He has published many technical papers and edited several book volumes. His research interests, aside from geology, include the history of Eastern science and interfaces between science and spirituality. His essays and book reviews have appeared in various journals including *Current Science* (Indian Academy of Science), *Earth* (formerly *Geotimes*), *World and I Online Magazine*, and *Interreligious Insights*. His website is found at www.rasoulsorkhabi.com.
